

TLD TMX 150-12

The TLD TMX-150 is optimised for efficient towing and pushback operations on narrow body commercial aircraft like the Airbus A320 family and all versions of the Boeing B737 including the Classic, NG and Max series. Its compact design allows a handy and safe maneuvering on aircraft position and its two seat driver cabin gives a good overview for the driver.

The 4-wheel drive provides a very good traction even at wet tarmac conditions.

ADDITIONAL INFORMATION

Manufacturer	TLD
Model	TMX-150-12
Manufacturing year	2011
Operation hours	946
Self weight	11.700
Drawbar pull	max. 20.880 lbs
Engine manufacturer	Deutz
Engine power	74,9 kW
Engine type	TCD 2011 L04W
Engine fuel type	Diesel
Gearbox	Automatic
Drive	4-wheel drive
Steering	4-wheel steering
Width	2.000 mm
Height	2.000 mm
Ground clearance	approx. 2.150 mm
Wheel base	2.150 mm
Color	White
Condition	Used, in serviceable condition
